A report on UK museums' Attendance.

Museums are very important to science and culture. Museums link average visitors with interesting scientific, historical ~~things~~ and cultural findings, raising interest in their ~~work~~. Fields of study and development respectively. Attendance of museums helps in understanding, how curious are people of the museum's contents.

As we can clearly see, art galleries have been steadily gaining attendance from 2013 onward, while science and history museums, like Natural History Museum or Science Museum, from 2013 to 2015 and then to 2012 have been losing attendance and then gained 0,3mly attendees respectively.

However, we should draw our attention not only whether attendance is dropping or not but also on its rate. From 2015, the rate of growth in attendance significantly dropped, while decline in attendance of stopped completely.

Data shows that at this rate, Natural History Museum and Science ^{museum} won't catch up to art galleries' attendance, even with ^{their} now slower growth rate. But there are ways for science museums to gain visitors. For example, museums can implement interactive stands with QR-codes that when scanned, open either a minigame, quiz or a graphic scheme related to the topic. This would appeal to a younger demographic and by that, bring a substantial amount of visitors in form of families with kids. Also, taking advantage of internet ads can really help bring more attendance.

All in all the decline in attendance of scientifically and historically oriented museums compared to art galleries, is noticeably substantial, but not fatal or irreversible.
