#### Rate of Cultural Attendance

##### Introduction

Now I am going to describe the data showing attendance of museums and galleries in England in different years. Looking at the given table, we can make some assumptions.

##### The main features

To start with, most places seem to appeal to more people each year, varying from 5.6 mln to 2.2 mln in 2017. At the same time, other museums had a substantial decline in visitors in a two-year period. The British Museum, National and Tate Galleries respectively remain in number of people attending from 2015 to 2017.

##### Analysis

As we can see, the Science Museums had a more sharp fall in visitors in 2015 than the Natural History Museums. Therefore, both of these museums had a decline, while other mentioned places showed a high rise over the two years. This situation can be drawn on Natural History and Science Museums introducing admission charges right before 2015.

##### Recommendations

In my opinion, the two mentioned galleries should make some light improvements to keep attracting people as the numbers rise too slowly. As for the Natural History and Science Museums, there should be a lower admission charge in both for the rates to be as good as in 2013.

##### Conclusion

To sum it all up, I think that the overall attendance of museums and galleries in England is rather high, according to the shown
